Harrison Clinical Research

*Clinical Unit, Munich, Germany
Volunteer and Patient Database*

Date: 30th of January 2012

Remarks:

A given subject may have more than one diagnose and may appear under two diseases. Within a diagnose, the sub-categories are exclusive, i.e., a given subject appears in only one category of the disease class. Due to a few missing data, the sum of individual numbers may be lower than the total sum.

NOS = no other specification

subjects total		20756
-----------------------	--	-------

gender	male	9509
	female	11247

age	18-50	13908
	50-60	3331
	60-70	2561
	> 70	956

BMI	30-40	2510
	>40	293

smokers	total	6576
[cigarettes per day]	<10	2742
	11 to 20	1901
	>20	814
	smoker NOS	1119

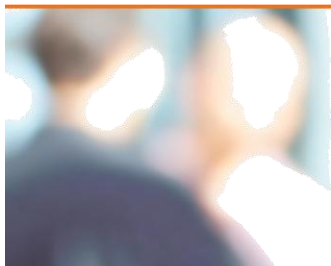

non-smokers		14180
--------------------	--	-------

hyperlipidemia		2877
-----------------------	--	------

hypertension		2627
---------------------	--	------

skin disease	psoriasis	334
	neurodermatitis	280
	others	282

kidney disease	insufficiency	69
	kidney cirrhosis	16
	others	195

liver disease	cirrhosis	47
	fatty liver	122
	others	163

heart disease	insufficiency	41
